Other Business includes retreading operations and the Truck Tyres unit. (The name of Nokian Retreading Operations and Truck Tyres was changed to Nokian Truck Tyres as of 1.2.2006). Each profit centre is responsible for its business areas and its financial performance, balance sheet and investments, supported by the different service functions. Service functions include logistics and purchases, sales, financial administration, communication, business development, human resources

and production services. The Group's sales companies are a part of the sales function and serve as product distribution channels in local markets.

The tyre chain is organised into a separate sub-group, whose parent company is Vianor Holding Oy, fully owned by the parent company Nokian Tyres plc. The tyre outlets operating in each country are part of the sub-group. The key features of the Group's legal structure are shown in the diagram on page 43.

The parent company and sales companies buy internal auditing as a service from public accountants or other service providers if needed. The audit focuses on items separately determined each time.

Risk management

The Group has adopted a risk management policy approved by the Board of Directors, which supports the achievement of goals and ensures business continuance. The risk management policy encompasses all the risks related to business operations and strategy, and ensures that customers and end-users can trust the company's products and services. By managing risks the company can improve its competitiveness and seize opportunities more efficiently than its competitors.

Nokian Tyres takes deliberate risks that are a natural part of its strategy and goals, and which it aims to reduce in various ways. Once the risks related to decisions and policies have been identified and recognised, the company can take action in a controlled manner without endangering business continuance, products, services, brand, reputation, personnel or the safety of core interest groups. Risk management also ensures that the company's operations comply with legislation and regulations.

The risk management process aims to identify and evaluate risks, and to plan and implement practical measures for each one. Such measures may include, for example, avoiding the risk, reducing it in different ways or transferring the risk through

insurances or contracts. Risk management is not allocated to a separate organisation; its tasks follow the general distribution of responsibilities adopted in the organisation and other business activities. The main risks detected in risk surveys are reported to the company's Board of Directors once a year.
